
Local-only path
$p_{\text{easy}} \geq t$
Frozen local baseline context
Local baseline reasoning + extraction
Local answer
CALIPER core always uses the collaborative path.
Question q
3. Execution classifier
Optional fastText
$p_{\text{easy}}(q)$
Cloud
Question-only guidance
$ins(q)$
1. Local evidence-grounded answering
Local reasoning
$(q, R, ins) \mapsto h$
Local extraction
$(h, q) \mapsto a_0$
Final answer
Optional local Reflection
check and revise; at most three attempts
Collaborative path
$p_{\text{easy}} < t$
2. Source-adapted local retrieval
Select pair
Source router
Predict benchmark source from the question
Selected FT embedder + reranker
Retrieved evidence R retained locally
MuSiQue collaborative context also includes BASE top-three support.
Source labels: HotpotQA, MuSiQue, 2Wiki.
Labels are training targets, not inference inputs.
